Notice of Allowability	Application No.	Applicant(s)
	10/605,138	PREMERLANI ET AL.
	Examiner	Art Unit
	Boris Benenson	2836
The MAILING DATE of this communication appears on the cover sheet with the correspondence address All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS. This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.		
1. X This communication is responsive to <u>9/10/2003</u> .		
2. The allowed claim(s) is/are 1-12.		
3.		
Attachment(s) 1. ☑ Notice of References Cited (PTO-892) 2. ☐ Notice of Draftperson's Patent Drawing Review (PTO-948) 3. ☑ Information Disclosure Statements (PTO-1449 or PTO/SB/0 Paper No./Mail Date 9/10/03.10/30/03 9/15/03 5. 05. 04	5.	atent Application (PTO-152) (PTO-413), :e
4. Examiner's Comment Regarding Requirement for Deposit of Biological Material		ent of Reasons for Allowance

Application/Control Number: 10/605,138

Art Unit: 2836

Allowable Subject Matter

Page 2

1. Claims 1-12 are allowed.

The following is an examiner's statement of reasons for allowance:

- 2. Independent Claims 1 and 7 are allowable because none of the prior art of record disclose a method or a system for compensating for communications channel delay asymmetry in a current differential protection system comprising a step or a mechanism for computing a compensated clock offset by subtracting said apparent GPS clock offset from said apparent sampling clock offset so as to cancel out a channel asymmetry component of deviation in said apparent GPS and sampling clock offsets in combination with the other claim limitations.
- 3. Claims 2-6 and 8-12 are dependent on allowable claims and therefore allowable.

Related Prior Art

4. Sugiura et al. U.S. Patent 6,678,134 disclose a Digital Protective Relay System wherein a sampling pulse of a GPS satellite corrects frequency of sampling pulse (S2a) of a first relay device and sampling pulse (S2b) of a second relay device so that the timing difference measured is substantially zero. Consequently, in protective relay devices, which are mutually

Page 3

Art Unit: 2836

independent, since asynchronous sampling pulse S2a and S2b serve as the same timing on the basis of the fixed cycle pulse (S0) of GPS, the synchronization between terminals of the devises is established. Nevertheless the system assumes that transmission delay times for communication transmitted from the first relay device to the second relay device and for communication transmitted from the second relay device to the first relay device are equal. None of Prior Art of the record disclose compensation of click offset with GPS clock offset in a situation when data transmitted and received through different routes and therefore transmit/receive delay times are asymmetrical.

Comments to reasons for allowance

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Contact information

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Boris Benenson whose telephone number is (571) 272-2048. The examiner can normally be reached on M-F (8:20-6:00) First Friday Off.

Application/Control Number: 10/605,138

Art Unit: 2836

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brian Sircus can be reached on (571) 272-2800 ext 36. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
